## **Will Rogers World Airport is Hot!** *Airport Terminal is Now WiFi Enabled*

OKLAHOMA CITY – Travelers at Will Rogers World Airport can now be “connected” anytime, anywhere, while waiting at the airport. The terminal is officially “wireless” today. The service is being provided by Concourse Communications Group, LLC and is available throughout the entire building including the concourse, ticket lobby and baggage claim areas.

Orlando Saez from Concourse will be on site from 9:00am to 11:00am to answer questions and provide a demonstration to travelers via big screen TV. Passes for 60 free minutes will also be distributed to travelers.

Mark Kranenburg, Director of Airports is pleased the system is up and running. “So many good things have been happening at Will Rogers. Our passenger traffic reached record numbers in 2005, our terminal expansion is in its final phases, great new concessions have come on board, and now WiFi. It is just another amenity that will further enhance the travel experience for our customers.”

WiFi users at Will Rogers can purchase a one-day pass for \$6.95. The pass may also be

used at all participating Concourse airports – Atlanta-Hartsfield, Detroit Metro, JFK, LaGuardia, Chicago Midway and O’Hare, Minneapolis/St. Paul, Nashville Newark Liberty, Ottawa International and Lester B. Pearson Toronto.

Concourse also has roaming agreements with many of the major Wireless Internet Service Providers (WISP’s) that allows customers to logon with their existing accounts. Those WISP’s include iPass, Boingo, T-Mobile, SBC, Cingular, Sprint, iBahn(STSN), GoRemote and WeRoam.

In addition to providing hotspot service throughout the public areas of the terminal, Concourse will provide a common-use wireless LAN for use by all tenants of the airport.

In November, the Oklahoma City Airport Trust awarded Concourse Communications Group, LLC a contract, through competitive bid, for the design, installation and operation of a neutral-host wireless voice and data network at Will Rogers. The final installation and testing of equipment was completed last week.

### **About Concourse Communications Group, LLC**

As the leading operator of neutral host Wireless Access Systems, Concourse Communications Group is redefining wireless communications services at major U.S. airports and other commercial venues throughout the US and Canada. These systems provide wireless voice and data services supporting the public, commercial wireless service providers, airport operators and their tenants.
